ADITYA AGRAWAL

Fintech - Full Stack + AI Engineer · Self Directed Investor
Bengaluru, KA, India | +91 95651 17059 | aditya33agrawal@gmail.com | LinkedIn | StockScore

SUMMARY

Full stack engineer (1.5+ yrs) who ships AI into production, fine tuned models, RAG pipelines, and AI agents deployed into live products on Azure, combined with hands-on finance and equity research depth. Creator of StockScore, a full stack web app that scores Indian listed equities on a transparent, rule based fundamental rubric. Owns delivery end to end, from business requirements to deployed software, and bridges engineering with real world investing.

FLAGSHIP PROJECT

StockScore - Equity Research & Scoring Platform (Next.js, Vercel) stockscore-seven.vercel.app

- Built and deployed a full stack web app that scores Indian listed companies on a transparent 100 point fundamental rubric; engineered the data pipeline ingesting 5 years of financials, 12 quarters of results, shareholding patterns, and key ratios per company.
- Replaced the cliff edge thresholds typical of screeners with continuous logistic/linear scoring and sector relative benchmarking across 10 categories (quality, growth, valuation, balance sheet, cash flow, momentum, shareholding) - every point traceable to a documented rule.
- Surfaced insights via sector leaderboards, radar overlays, and per-company factor breakdowns, with rule based bonuses and tail risk penalties; methodology fully published.

EXPERIENCE

Technology Evangelist (Development) - *Meteoros Automation LLP, Bengaluru* Sept 2024 - Present

- Delivered two client-facing web apps (educational assessment portal, course selling platform) and created an internal HRM system end to end - requirements, design, full stack development, testing, and deployment.
- Built and deployed on Microsoft Azure (App Services, Azure SQL); configured AI agents in Copilot Studio and **integrated Azure AI Foundry models into production**.
- Served as a point of contact for clients: managed expectations, led release planning calls, and translated business requirements into technical specifications. (Break Sept 2025 - Jan 2026 for CAT preparation.)

AI Engineer Intern - *GyanGrove, Bengaluru* June 2024 - Sept 2024

- Led development of three **production AI features** (fine tuned image models, RAG content pipelines) and shipped them into the live product via production grade Spring Boot APIs.

Machine Learning Engineer Intern - *Mind Web Ventures, Remote* Feb 2024 - May 2024

- Built an XGBoost phishing URL detector (96% accuracy) served via FastAPI, and a RAG powered Q&A chatbot over custom document databases (PDF, CSV).

INVESTING & ADVISORY EXPERIENCE

- Self-directed investor since 2023: built a personal multi-asset portfolio (direct equities, equity/debt mutual funds, gold & silver ETFs) using fundamental analysis (P&L, balance sheet, cash flows) and asset allocation principles.
- Guided several first time investors on goal setting, SIP planning, fund selection, and risk profiling; explained equity vs. debt and SIP vs. lump sum trade offs in plain terms.

SKILLS & EDUCATION

Education: B.Tech, Computer Science & Engineering - Manipal University Jaipur (2020-2024)
GPA 8.05/10. CAT 2025: 95.83 percentile.

Engineering: Python, JavaScript, SQL, Node.js, React, Next.js, FastAPI; Microsoft Azure, AWS; Machine Learning, Model training, Agentic AI, Generative AI (RAG, fine tuning), AI agents.

DevOps & Infrastructure: CI/CD pipelines, deployment & release, database design & management (SQL, Azure SQL), cloud deployment on Microsoft Azure (App Services), version control with Git.

Finance: Fundamental analysis, equity research, asset allocation & portfolio rebalancing, mutual funds (equity/debt), SIP & goal based planning, risk profiling, behavioural finance.
